The items below are copied from "The Catalogue of K-Vowel-N Words of the World," which currently (February, 2006) is online at the ***Etymology to the Maximum*** website, http://www.lionsgrip.com/etym.html . The author created this catalogue over a three-year period, finishing in 1992. It is in spreadsheet format, and interested readers are encouraged to try to find one of the versions that opens on your computer. With it, you can sort the columns any way you like: by the words themselves, by language, by Meanings, etc.

A ***Meaning,*** as used in this study, is a generally-used human concept that is evidenced by KVN words found among numerous language groups throughout the world. Meanings are seen to group themselves around even more general concepts, as arranged in this presentation. These more-general concepts are designated as ***Clusters*** and ***Sub-Clusters***. These are not fixed groupings, but, like any scientific key, can be equally successful under many different groupings and arrangements.

Once again, the author does not claim that this arrangement is a fixed thing, and it surely is not yet complete. Many arrangments are possible, and much work remains to be done.

In the Value Cluster I've lumped two concepts that should probably be divided into separate Clusters: merit and wealth. The wealth ideas must have come from metal as a product of the forge (when man presumably becomes hungry for concentrated exchangeable objects) and thus descend from the Fire aspect of Kan, while the merit-based ideas would be attributes of the Leaders of the (clan) society. Metal is valuable; people do good. Or so it would seem. More discussion!
