~~~~~

### **USE THE TRACTION PADS WITH THE WAVY SIDE DOWN.**

THE WAVY NETTING  
MERGES DEEPER INTO  
THE SOFT TERRAIN.  
HOWEVER, BOTH SIDES  
ARE EFFECTIVE.

~~~~~

PUT A TRACTION PAD IN FRONT OF THE NON- DRIVING TIRES.

THIS SMOOTHS THE THE
WALL OF MUCK THAT IS
IN FRONT OF THOSE
TIRES.

~~~~~

### **PUT A TRACTION PAD IN FRONT AND BEHIND THE DRIVING TIRES.**

THIS LETS YOU "ROCK"  
BACK AND FORTH AND  
DRIVE OUT IN EITHER  
DIRECTION.

~~~~~

POKE THE TRACTION PADS UNDER THE TIRE SLIGHTLY, ENOUGH TO MAKE CONTACT.

USE WHATEVER IS
HANDY--- STICK,
SCREWDRIVER, ETC.

~~~~~

### **IN WATERY MUD, SANDWICH 2 TRACTION PADS TOGETHER IN FRONT OF EACH TIRE.**

THIS GIVES MORE  
PENETRATION.

~~~~~

IN SNOW, MAKE A ROW OF TWO TRACTION PADS IN FRONT OF EACH DRIVING TIRE.

THIS MAKES A LONGER
RUN.
